Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit:

I. Rejection of claims under 35 U.S.C. 112 will not be maintained in light of amendment filed 1/15/03. Examiner agrees that Applicant defines what is meant by the phrase: "vicinity of".

II. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejection under 35 U.S.C. 102 (b)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,5,9-13,17,26,30-32,35-41 are rejected under 35 U.S.C. 102(b) as being anticipated by Stacey et al (US 5175149; 12/29/92). Stacey teaches a method of applying a composition comprising pentasaccharide having a fatty acid attached (LCO) thereto and a carrier to a legume plant seed. Stacey teaches that the legume plant seed is the soybean plant seed. Stacey teaches that the pentasaccharide is isolated from Rhizobium Bradyrhizobium japonicum. It is inherent that the application of the pentasaccharide would break the dormancy of a plant. See abstract, column 1 line 50 - column 3 line 12, column 4 line 51 - column 5 line 11.

Claim Rejection under 35 U.S.C. 103(a)

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6-8,14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stacey as applied to claims 1,5,9-13,17,26,30-32,35-41. See 35 U.S.C. 102(b) above. Stacey recites all that is in claims 6-8,14-16 except for the invention comprising the instant amounts of LCO. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to determine the optimum amount of LCO. One would have been motivated to do this in order to develop the most effective method for enhancing seedling emergence of plant crop.

Claim Objection

Claims 2-4,18-21,27-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or suggest the instant method wherein the pentasaccharide is applied to non-legume plants.
